### What does it mean if my ABS light is on?

The traction off comes on when the abs light is on to show it has been disabled. The traction control uses the abs sytem to help control it.The most common reason that this happens is a bad wheel speed sensor which is all part of a bearing hub assembly. You can also check the wires going to the abs sensors to make sure none of them were damaged.

### SOLVED: ABS light on 2004 Ford expedition - Fixya

a worn front well bearing can cause abs light to come on and cause a howling noise but the noise stops when vehicle is not moving.you could pull each fuse one at a time and when the noise stops u could look in your trucks manual to see what that fuse powers and find your problem that way.
