Oracle Inventory User's Guide

Master scheduling is used for: You use the schedules generated by master scheduling as input to other manufacturing functions, such as material requirements planning and rough-cut capacity planning. The MDS is a statement of demand and contains details of the anticipated shipment schedule.

Master Scheduling | OracleUG

Use the master demand schedule source list to associate individual forecasts with your MDS. Load the adjusted (unconstrained) forecasts into a master demand schedule. You can load individual forecasts, for example, for customers and sales regions, into a single master demand schedule and plan them all at once. See Oracle Master Scheduling/MRP User's Guide. Run collections. Demand from Oracle Demand Planning

Oracle Advanced Supply Chain Planning Implementation and ...

Oracle Master Scheduling/MRP and Supply Chain Planning automatically consumes forecasts for product families, configurations, models, option classes, and options when you place sales order demand for configurations. By default, forecast consumption consumes forecasts by item.

Forecast Explosion | OracleUG

Time fence control is a policy or guideline you establish to note where various restrictions or changes in operating procedures take place. For example, you can easily change the master production schedule for an item beyond its cumulative lead time with little effect on related material and capacity plans.
