Automation

## **Responsibilities, Skills, and Tools ...**

QA automation engineers must have at least a bachelor's degree in computer science, IT, software engineering, or a similar field. Many employers prefer QA automation engineers to have a master's degree, though past work experience with manual and automated testing procedures can suffice for education.

Q #39) What is an

Automated test script?

Answer: An automated

test script is a short

program that is written

in a programming

language to perform a

set of instructions on

an application under

test to verify if the

application is as per

the requirements. This

program when run,

gives the test results

as pass or fail to

depend on if the

File Type PDF

Software Test

Automation

application is as per  
the expectations.
